

Learn & Serve Grant Monitoring System

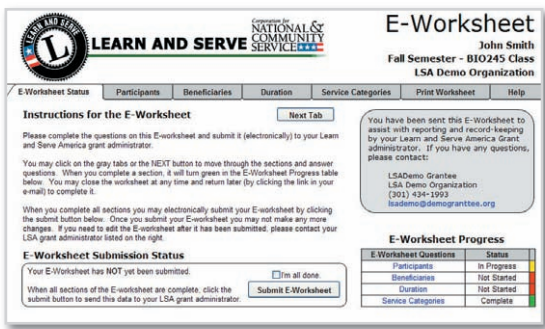

Shane Brenizer, UI Designer

Relyon Solutions

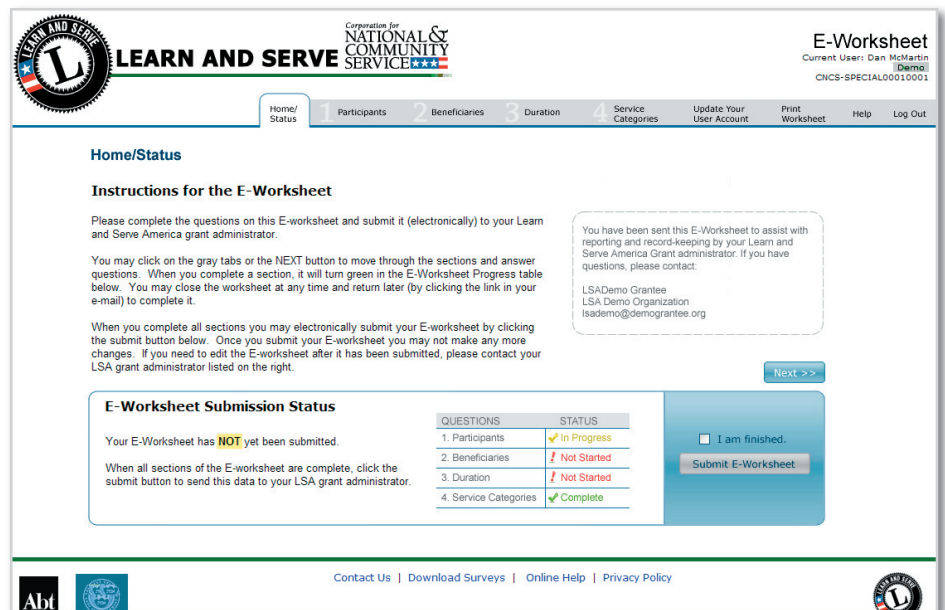

BACKGROUND: Relyon Media was hired by Abt Associates to build a survey that tracked the distribution and allocation of grants and sub-grants.

PROBLEM: The survey was so long that it was difficult for participants to complete in one sitting. A comprehensive status system was imperative for success.

SOLUTION: Shane Brenizer designed a new Home/Status page and an accordion navigation system that contained a status for each step of the survey. Each year a new survey would be launched to track grants. Each year UI improvements would be made to the survey based on participant feedback.

Shane Brenizer redesigned the main page to put emphasis on the areas that required user attention.

A major problem found during user testing was the numerous screens and questions for each. Shane Brenizer designed an accordion navigation with a built-in status on each level.
